Create an html page with inline, internal, external CSS style sheet

Index.html

```
<html>
    <head>
        <title>Home Page</title>
        <link rel="stylesheet" href="./index.css">
    </head>
    <style>
    class1s
        {
            color:blue
        }
    </style>
    <body>
        <h1 style="color:red;">This is inline CSS</h1>
        <h1 class="class1">This is internal CSS</h1>
        <img src="C:\Elizabeth\images\flower.jpg">
        <h1 class="class2">This is external CSS</h1>
        <h2 class="class1">Hello World</h2>
        <p class="2">A webpage is aspecific collection of information provided by a website and
displayed
                                to a user in  a web browser.   A website typically consists of
many
                                webpages linked together in a coherent fashion.
        </p>
```

```
        </body>

</html>

Index.css

<!DOCTYPE html>

class2

{

        color:rgb(85,5,58);

}

p

{

text-indent:900px;

line-height:1.6;

word-spacing:40px;

margin-top:auto;

margin-bottom:40px;

margin-left:40px;

margin-right:40px;

}

body

{

background-color:gray;

background-image:url(flower.jpg);

backround-repeat:repeat-x;

background-attachment:fixed;
```

```css
background-position:center;

text-align:center;

}

p

{

border-style:dotted;

border-width:20px;

border-bottom:50px;

border-color:blue;

border-radius:30px;

}

h2

{

text-align:left;

text-decoration:underline;

text-transform:uppercase;

}
```
